MINI Cooper S / Cooper S Cabrio

Akrapovič Evolution exhaust system for the Mini Cooper S (R56) and the Cooper S Cabrio (R57)

Akrapovič Evolution (Titanium) exhaust system for the Mini Cooper S (R56) and Cooper S Cabrio (R57)

The Mini is considered a car that always brings a smile to one's face with its playful look and particularly its position on the road, which is reminiscent of driving a go-kart. The engineers from Akrapovič prepared a number of solutions for the little devil that further increase the performance of the Mini Cooper S and Cooper S Cabrio as well as make it sound even more appealing. Just by looking at the rear, we can see that it's an Akrapovič - namely, the rear boasts a dual exhaust system outlet of a larger diameter, shaped like racing exhausts, which can also be ordered separately from other parts of the entire exhaust system. The tail pipes are made of titanium or carbon fiber; both materials are considered extremely durable and light and are mostly used in the racing world.

We offer a number of exhaust systems from the Evolution series that cover an entire range of possible desires - everything from the change of appearance by using outlets made of racing materials to improving performance and driving dynamics. The first one is the Evolution exhaust system with an integrated resonator and end muffler, adjustable tail pipes made of titanium or carbon fiber. The next step in the evolution of improvements is a similar system, made from lighter and more durable titanium - the Evolution (Titanium) exhaust system with an integrated resonator and end muffler, which also offers the option of selecting adjustable tail pipes made of titanium or carbon fiber. The most demanding customers can also upgrade the Evolution (Titanium) exhaust system by using a down pipe and catalyst (100 cpsi) that greatly improve the motor's performance at all revolutions, which is evident from the enclosed diagram. It also shows improvements to torque in the area all the way up to the red field, which will undoubtedly please those drivers who squeeze the maximum out of their Cooper S and Cooper S Cabrio. For those who are more excited about the look of their Mini, we offer solely outlets made of carbon fiber or titanium.

Evolution (Titanium) exhaust system, homologated:

- exhaust system with integrated resonator and end titanium muffler
- titanium or carbon fiber tail pipes

Hard facts*:

- plus 7.6 HP at 5900 rpm
- plus 7 Nm at 3400 rpm
- minus 7.14 kg

Evolution exhaust system, homologated:

- exhaust system with integrated resonator and end muffler
- titanium or carbon fiber tail pipes

Hard facts:

- plus 2.4 HP at 5500 rpm
- plus 5.6 Nm at 3530 rpm
- minus 5.77 kg

Tail pipes:

- tail pipes made of titanium or carbon fiber

Optional:

- down pipe with catalyst (100 cpsi)

* down pipe with catalyst (100 cpsi)
